

VICTOR ZION

Backend Engineer | AI Ops Engineer

Akwa Ibom, Nigeria • (+234) 810-5123-142 • [Victor Zion](#) • [Twitter](#) • [Portfolio](#) • [Medium](#)

PROFESSIONAL SUMMARY

Back-End / AI Ops-oriented engineer and technical writer with 4 years of experience building LLM systems, FastAPI services, RAG pipelines, and developer documentation across remote teams. Highlights production delivery, documentation quality, and measurable impact such as 40% organic traffic growth and 50% documentation cycle reduction.

EXPERIENCE

GemNexus, Nigeria — Chief Technology Officer (Remote) *December 2025 - PRESENT*

- Led technical direction for a digital literacy training platform, owning tool selection, infrastructure, and roadmap for career advisory products.
- Owned QA and iterative delivery cycles, ensuring engineering output stayed aligned with product goals.
- Mentored the engineering team on technical delivery practices and documentation standards.

Demz Aminytics, London — LLM Engineer (Hybrid) *January 2025 - April 2025*

- Built a Markdown documentation automation engine using OpenAI o3-mini and vector embeddings, cutting documentation cycles by 50%.
- Created a screen-recording summarization tool with faster-whisper and o3-mini, lifting team efficiency by 30%.
- Deployed AI-driven solutions on AWS through CI/CD pipelines, building REST APIs for backend engineers to integrate scalable, high-availability systems.

Hackmamba.io, Delaware, United States — Documentation Engineer (Remote) *October 2025 - PRESENT*

- Migrated documentation platforms for nTop, Coinbase, and FrankieOne to Mintlify, restructuring information architecture and driving a 40% increase in organic traffic.
- Partnered with engineering teams to translate complex system features into structured, maintainable developer docs.

Wedigraf Technologies, Uyo — Intern Flutter Developer (On-site) *January 2023 - June 2023*

- Built a Flutter/Dart cross-platform app with authentication, real-time chat, and push notifications as part of a five-member team.
- Delivered a responsive UI that increased user engagement by 20%.

KEY PROJECTS

Volta — AI-powered poetry generation app that crafts poems stanza by stanza. Built with Python, Streamlit, OpenAI SDK, OpenRouter.

LifeLens — Progressive web app for structured life reviews with AI-powered insights and Firebase-backed persistence. Built with React (Vite), Tailwind CSS, Firebase Firestore, Gemini API.

EDUCATION

University of the People, Pasadena, California — B.Sc. Computer Science (In Progress)

June 2026 - Present

Akwa Ibom State University, Ikot Akpaden, Mkpato Enin, Nigeria — B.Sc. Computer Science

March 2019 - March 2023

TECHNICAL SKILLS

Backend & AI Ops: Python, FastAPI, Docker, AWS, GCP, CI/CD, REST APIs, Linux/WSL2, Git/GitHub

AI/ML: LangChain, RAG, LLMs, NLP, Hugging Face, Ollama, OpenAI API, Gemini API, Anthropic Claude API

Documentation: Mintlify, Markdown, Technical Writing, API Documentation

SOFT SKILLS

Communication, Technical Storytelling, Leadership, Strategic Thinking, Mentorship, Attention to Detail, Self-Directed Learning, Cross-functional Collaboration

ACTIVITIES

Volunteer and Member, Machine Learning Uyo (2025)
Volunteer and Member, Python Community Uyo (2025)

ACHIEVEMENTS & AWARDS

Chief Technology Officer — GemNexus
Stakeholder/Member, Board of Directors — Sophnex Solutions

INTERESTS

Mentoring, Research, Music, Solving Logic Puzzles

LANGUAGES

English (Fluent) · Spanish (Basic)
