

Victor Zion

LLM Engineer · Documentation Engineer · Developer Marketing

Uyo, Akwa Ibom, Nigeria • (+234) 810-5123-142 • victorzion1@gmail.com • [linkedin.com/in/victor-zion-1b85a440a](https://www.linkedin.com/in/victor-zion-1b85a440a) • zhayon-io.netlify.app • [@zhayon_io](https://twitter.com/zhayon_io)

PROFESSIONAL SUMMARY

LLM Engineer and Documentation Engineer with 4 years of professional experience and 8 years in tech, combining hands-on AI system building with technical communication. I build production LLM systems — RAG pipelines, vector search, agent systems, and FastAPI services — and document them with the accuracy that comes from first-hand engineering experience. Currently working across Hackmamba (Mintlify documentation migrations), Elora (AI healthcare research), and GemNexus (CTO), while building techDNA, an AI-powered career discovery platform. I bring both the engineering credibility and the communication clarity that most candidates offer separately.

EXPERIENCE

Documentation Engineer | [Hackmamba.io](https://hackmamba.io) — Delaware, USA (Remote) *Oct 2025 – Present*

- Migrated legacy documentation platforms for clients including nTop, Coinbase, MX, and FrankieOne to Mintlify, improving content discoverability and developer experience.
- Drove a 40% increase in organic traffic through SEO-optimised technical content and improved information architecture.
- Translated complex system features into clear, actionable developer documentation in close collaboration with engineering teams.

LLM Engineer / Technical Writer | [Elora](https://elora.ai) — Nigeria (Remote) *Aug 2025 – Present*

- Researched AI applications in dermatological informatics, producing technical reports that informed core product architecture decisions.
- Authored system architecture documentation and operational workflow guides for internal and external developer audiences.
- Collaborated with cross-functional teams to integrate AI-driven solutions into product offerings, contributing to a 25% increase in user engagement.

Chief Technology Officer | [GemNexus](https://gemnexus.ai) — Nigeria (Remote) *Dec 2025 – Present*

- Defined and drove the technical vision for GemNexus's digital literacy training platform, selecting infrastructure and tools aligned with organisational goals.
- Led the product development lifecycle for career advisory tools, overseeing engineering roadmaps, QA processes, and iterative delivery.
- Mentored the engineering team and championed a culture of continuous learning and technical capacity building.

LLM Engineer | [Demz Aminytics](https://demzaminytics.com) — London, UK (Hybrid) *Jan 2025 – Apr 2025*

- Built an automated Markdown documentation engine using OpenAI o3-mini and vector embeddings, reducing internal documentation cycles by 50%.
- Engineered a screen recording utility using faster-whisper and OpenAI o3-mini to automate video summarisation and action point extraction, improving team efficiency by 30%.
- Collaborated with backend engineers to deploy AI-driven solutions on AWS, prioritising scalability and high availability.

Flutter Developer (Intern) | [Wedigraf Technologies](https://wedigraf.com) — Uyo, Nigeria (On-site) *Jan 2022 – Jun 2022*

- Built a cross-platform mobile application in Flutter/Dart, implementing user authentication, real-time chat, and push notifications.

- Delivered a responsive UI that drove a 20% increase in user engagement across devices.

PROJECTS

techDNA

An AI-powered career discovery quiz that identifies where someone naturally belongs in tech — no prior experience required. Built as a full-stack product with Netlify serverless functions, Supabase for vector storage and persistence, and Resend for email delivery.

Stack: HTML, CSS, Vanilla JavaScript, Google Gemini API, Supabase, Netlify Serverless Functions, Resend

Redocly Documentation Site

A production Mintlify-hosted developer documentation site for Redoc, an open-source tool that generates three-panel API documentation from OpenAPI/Swagger specs. Demonstrates end-to-end documentation architecture, information architecture design, and platform migration skills.

Stack: Mintlify, Markdown, MDX, JSON, OpenAPI/Swagger, REST API Documentation

LifeLens

A progressive web application for structured life reviews across 9 areas, with AI-powered insights via prompt engineering, trend charts, and email reminders. Demonstrates full-stack AI integration with persistent cloud storage.

Stack: React (Vite), Tailwind CSS, Firebase Firestore, Google Gemini API, EmailJS

Volta

An AI-powered poetry generation app that crafts poems one stanza at a time using streaming LLM output, with a robust model fallback system and agent-style chaining across OpenRouter's model catalogue.

Stack: Python, React (Vite), Google Gemini API, OpenRouter

TECHNICAL SKILLS

Languages: Python, JavaScript, HTML/CSS, Dart

AI / ML: LangChain, RAG, LLMs, NLP, Vector Databases, Embeddings, Prompt Engineering, Agent Systems, Hugging Face, Ollama, OpenAI API, Anthropic Claude API, Gemini API, faster-whisper

Backend & Cloud: FastAPI, REST APIs, Streamlit, React, Supabase, Firebase, Docker, GCP, AWS, CI/CD, Linux/WSL2

Documentation: Mintlify, Markdown, MDX, OpenAPI/Swagger, REST API Documentation, Docs-as-Code, Information Architecture, Style Guides, Content Strategy, Technical Writing, API Documentation

Tools: Git/GitHub, Notion, Postman, Cursor IDE

EDUCATION

B.Sc. Computer Science (In Progress) — University of the People 2026 – Present

Online, accredited U.S. institution — pursuing alongside active industry roles.

B.Sc. Computer Science (Attended, did not complete) — Akwa Ibom State University Mar 2019 – Mar 2023

COMMUNITY & ACTIVITIES

Volunteer & Member — Machine Learning Uyo (2025)

Volunteer & Member — Python Community Uyo (2025)

Member — BitDevs Uyo (2026)

Stakeholder / Member, Board of Directors — Sophnex Solutions

LANGUAGES

English (Fluent) **Spanish** (Conversational)
