

Victor Zion

AI Engineer | Backend Engineer | Technical Writer

Akwa Ibom, Nigeria • (+234) 810-5123-142 • [Victor Zion](#) • [Twitter](#) • [Portfolio](#) • [Medium](#)

EXPERIENCE

[GemNexus](#), Nigeria— *Chief Technology Officer (Remote)*

December 2025 - PRESENT

Spearheaded the technical vision and strategic direction for GemNexus, orchestrating the selection of high-performance tools, platforms, and infrastructure to drive digital training programs and product ecosystems. Orchestrated the product development lifecycle and iterative engineering of technical solutions, ensuring seamless alignment with the organizational mission while overseeing quality assurance and roadmaps for career advisory tools. Spearheaded technical leadership and mentorship within the engineering team, championing a culture of continuous learning and capacity building to enhance digital literacy both internally and for the global learner community.

[Hackmamba.io](#), Delaware, United States— *Documentation Engineer (Remote)*

October 2025 - PRESENT

Orchestrated the migration of legacy documentation platforms, including nTop, Coinbase, FrankieOne, etc to Mintlify, significantly enhancing content discoverability and user engagement. Partnered with documentation migration teams to translate intricate system features into clear, actionable technical documentation. Catalyzed a 40% increase in organic traffic through the delivery of SEO-optimized technical content and improved information architecture.

[Elora](#), Nigeria— *LLM Engineer/ Technical Writer (Remote)*

August 2025 - PRESENT

Authored comprehensive technical documentation to delineate system architecture and operational workflows. Spearheaded advanced research initiatives exploring AI applications within the healthcare sector, specifically focusing on dermatological informatics. Partnered with cross-functional teams to orchestrate the integration of AI-driven solutions into core product offerings, catalyzing a 25% uplift in user engagement metrics.

[Morlabs Protocol](#), Nigeria— *AI Engineer/Lead Technical Researcher (Remote)*

March 2025 - PRESENT

Spearheaded research and integration of Solana ecosystem APIs and SDKs to architect a high-performance LLM-powered chatbot. Partnered with Backend and DevOps teams to engineer scalable services using Python and FastAPI, achieving a 30% reduction in system latency. Orchestrated the deployment of LangChain-based LLM solutions for automated documentation and code generation, driving significant improvements in technical efficiency.

[Demz Aminytics](#), The Avenue E4 9LD, London— *LLM Engineer (Hybrid)*

January 2025 - April 2025

Architected and deployed an automated Markdown documentation engine leveraging OpenAI's o3-mini, achieving a 50% reduction in documentation cycles for internal initiatives. Engineered an intelligent screen recording utility using faster-whisper and OpenAI's o3-mini to automate video summarization and action point extraction, resulting in a 30% uplift in team efficiency. Partnered with backend engineers to orchestrate the deployment of AI-driven solutions on AWS, prioritizing system scalability and high availability.

[Wedigraf Technologies](#), Uyo, Akwa Ibom State — *Intern Flutter Developer (On-site)*

January 2023 - June 2023

Spearheaded a five-member development team to deliver a cross-platform mobile application using Flutter. Mastered Dart and Flutter to architect and implement core functionalities, including user authentication, real-time chat, and push notifications. Developed a responsive UI that optimized cross-device compatibility, driving a 20% increase in user engagement.

PROJECTS

[techDNA](#) — *An AI-powered career discovery quiz that reveals where you naturally belong in tech — no experience needed. A follow-up consultation is given by the Tech Shepra - Victor Zion.*

Built with **HTML, CSS, Vanilla JavaScript, Email JS, and Google Gemini API.**

[PristineQuill](#) — *PristineQuill is an AI-powered poetry generation app created and designed to craft beautiful poems one stanza at a time.*

Built with **Python, Stream, openai-sdk, and OpenRouter.**

[Redocly](#) — *This is the Redocly documentation site — a Mintlify-hosted developer docs page for Redoc, an open-source tool that generates clean, three-panel web documentation from OpenAPI/Swagger description files.*

Built with **Markdown React, Mintlify, Markdown, and JSON**

[LifeLens](#) — *A progressive web application that helps you conduct structured life reviews across 9 areas with AI-powered insights, trend charts, and email reminders — backed by Firebase for persistent storage. Built by Victor for Victor.*

Built with **React (Vite), Tailwind CSS, Firebase Firestore, and Google Gemini API**

EDUCATION

[Akwa Ibom State University](#), Ikot Akpaden, Mkpato Enin, Nigeria— *B. Sc. Computer Science*

March 2019 - March 2023

[Heritage College](#), Uyo, Nigeria— *High School*

September 2012- September 2018

TECHNICAL SKILLS

Python, JavaScript, HTML/CSS, FastAPI, Streamlit, React, LangChain, RAG, LLMs, NLP, Hugging Face, Ollama, OpenAI API, Gemini API, Anthropic Claude API, Mintlify, Markdown, Notion, Git/GitHub, Docker, GCP, Linux/WSL2, Technical Writing, API Documentation

SOFT SKILLS

Communication, Technical Storytelling, Leadership, Strategic Thinking, Mentorship, Attention to Detail, Self-Directed Learning, Cross-functional Collaboration

ACTIVITIES

Volunteer and Member of [Machine Learning Uyo](#) (2025)

Volunteer and Member of [Python Community Uyo](#) (2025)

ACHIEVEMENTS & AWARDS

Chief Technology Officer – GemNexus.

Stakeholder/Member, Board of Directors – [Sophnex Solutions](#)

INTERESTS

Mentoring, Research, Music, Solving Logic Puzzles

LANGUAGES

English (Fluent)

Spanish (Basic)
